The aim of this document

1

The aim of this document is to give an in-depth description of the different fields and data elements contained in the XSD-files for Import declarations based on the EU Customs Data Model - <https://eucdm.softdev.eu.com/>

The document is structured after the EUCDM grouping of the data elements as well as DMS-specific data fields that are required by the system when using the S2S solution:

- **System-specific fields:** This section includes fields that are needed by the system to recognize what declaration is sent in, who is submitting the declaration, as well other data that is needed to fulfill the desired action.
- **Group 11:** This section contains basic information about the declaration and which procedures the declaration should be processed under. All this information influences how the declaration is processed, what kind of business scenario and procedure to be expected and requested.
- **Group 12:** This section is for the submitter to present all other relevant information and documents related to the submitted declaration that is not contained in the data fields. This is especially used for references tracking documents, authorizations and supplying tracking numbers.
- **Group 13:** This section contains information on all parties involved in the Import procedure. It is here information on the importer, exporter, declarant, fiscal reference, representative, etc., is provided either by ID or other identifiable information depending on whether the party is a company or private person.
- **Group 14:** In this section valuation information is given, examples of valuations are: taxes, transportation costs, delivery terms, etc.
- **Group 16:** This section contains the location-related information, e.g., where the goods will be or are presented (depending on whether it is a pre-lodged or a standard declaration) as well as the countries involved in the export/exit process.
- **Group 17:** This section contains information regarding which customs offices have handled the goods in the export/exit process.
- **Group 18:** In this section the submitter supplies more detailed information on the goods item(s) such as a weight, description, Taric code(s), etc.
- **Group 19:** This section contains information about the form of transport of goods, e.g., modes, container information, equipment, etc.
- **Group 99:** This section contains other information in the declarations which does not fit into the other above-mentioned groups.

Under each data element in the groups is provided a detailed description on whether the field is mandatory or optional as well as what rules to adhere to depending on the desired business scenario to make use of, and XML-examples are provided to give context.

Information on the EUCDM ID6 reference code is provided to help the reader in seeking further information if needed.

Glossary

2

To make the document shorter and easier to read, some abbreviations are used. Here is a list of the abbreviations used in this document.

Abbreviation	Description	Details
M	Mandatory	The field is mandatory to declare.
O	Optional	The field is optional to declare or should only be declared if relevant information is available.
MC	Conditionally mandatory	The information is mandatory dependent on other information given in the declaration, e.g., type of declaration or commodity code.
DL	Declaration level	The information is given on header level and applies to all the goods items in the declaration.
GSL	Goods shipment level	The information is given on goods shipment level and applies to all the goods items in the goods shipment.
GIL	Goods item level	The information is given on goods item level and applies to only the goods item it is declared under.
C/A	Defines whether an element can be corrected or amended	Yes/Yes means can be corrected and amended. Yes/No means it can be corrected but not amended No/Yes means it can't be corrected but it can be amended No/No means it can't be corrected or amended
EUCDM	European Union Customs Data Model	The European Union Customs Data Model (EUCDM) is the model for Customs trans-European systems such as NCTS, AES, ICS, EOS and for Member States national customs clearance systems
XSD	XML Schema Definition	A document that specifies how to formally describe the elements in an Extensible Markup Language (XML) document. This description can be used to verify that each item of content in a document adheres to the description of the element in which the content is to be placed.
XML	Extensible Markup Language	A simple text-based format for representing structured information, storing, and sending data. It is the file format used to send declarations to DMS.
n/a	Not Applicable	The information does not apply to the given element/declaration.
Requirement Overview	Mandatory / Optional / Conditionally mandatory / Levels / Rules	Defines whether an element is M, O, MC (see abbreviations above) or whether any EUCDM rules apply to the given element in a specific declaration.
M/O	Defines whether a field is mandatory or optional when the main field is in the XML Mandatory/Optional	For a lot of input fields, the sub elements of that field are not always mandatory even though the overall input field is. For example, is Supporting Document which is optional, but when put into to an XML, SequenceNumeric and ID becomes mandatory as the only elements.
ND	Not Determined	The mandatory or optional status of these elements are not yet determined.

Footnotes

3

Throughout the XML-Guide you will see several footnotes, all of these refers to this table. All these footnotes can also be found on EUCDM.

FOOTNOTE	DESCRIPTION
[1]	This information shall not be required in case a customs declaration has been lodged prior to the presentation of the goods pursuant to Article 171 of the Code.
[2]	In the cases where Article 166(2) of the Code (simplified declarations based on authorizations) is applicable, Member States may waive the obligation to provide this information where the conditions prescribed in the authorizations associated with the procedures concerned allow them to defer the collection of this data element in the supplementary declaration.
[3]	This element is an alternative to the unique consignment reference number [UCR] when the latter is not available. It provides a link to other useful sources of information.
[4]	This information needs to be provided only where Article 166(2) of the Code (simplified declarations based on authorizations) is applicable; in this case, it is the number of the authorization for simplified procedure. However, this data element can also contain the transport document number concerned.
[5]	This information is only required where the declaration of placing of goods under a customs procedure is used to discharge a customs warehousing procedure.
[6]	Where the EORI number or a third country unique identification number recognized by the Union is provided, the name and address shall not be provided.
[7]	The Holder of the transit procedure Identification number is mandatory only in the cases where the EORI number or a third country unique identification number recognized by the Union of the person concerned is not provided. Where the EORI number or a third country unique identification number recognized by the Union is provided, the name and address shall not be provided. The TIR Holder identification number is mandatory in case the Declaration type is TIR; otherwise, it cannot be used.
[8]	This information shall only be provided where available.
[9]	This information shall not be provided in respect of cargo remaining on board (FROB) or transhipped cargo for which the destination is located outside the Customs territory of the Union.
[10]	Member States may waive this information where the customs value of the goods in question cannot be determined under the provisions of Article 70 of the Code. In such cases the declarant shall furnish or cause to be furnished to the customs authorities such other information as may be requested for the purposes of determining the customs value.
[11]	This information is not to be provided when customs administrations calculate duties on behalf of economic operators on the basis of information elsewhere in the declaration. It is otherwise optional for the Member States.
[12]	This information is not required for goods eligible for relief from import duties, unless the customs authorities consider it necessary for the application of the provisions governing the release for free circulation of the goods concerned.
[13]	This information is not to be provided when customs administrations calculate duties on behalf of economic operators on the basis of information elsewhere in the declaration.
[14]	Except where it is essential for the correct determination of the customs value, the Member State of acceptance of the declaration shall waive the obligation to provide this information, if any of the following is the case: <ul style="list-style-type: none"> • where the customs value of the imported goods in a consignment does not exceed EUR 20.000 provided that they do not constitute split or multiple consignments from the same consignor to the same consignee,

	<ul style="list-style-type: none"> • where the importation is of a non-commercial nature • in case of continuing traffic in goods supplied by the same seller to the same buyer under the same commercial conditions.
[15]	Member States may require this information only in cases when the rate of exchange is fixed in advance by a contract between the parties concerned.
[16]	For completion only where Union legislation so provides.
[17]	This information shall only be required where the simplified declaration is not lodged together with an exit summary declaration.
[18]	This data element is mandatory for agricultural products with export refunds.
[19]	This data element is mandatory for agricultural products subject to refunds and for those goods which Union legislation requires the origin of the goods in the context of trade with special fiscal territories.
[20]	<p>This information is required where:</p> <ul style="list-style-type: none"> a) no preferential treatment is applied or b) the country of non-preferential origin is different to the country of preferential origin.
[21]	This information is required where a preferential treatment is applied using the appropriate code in D.E. 14 11 000 000 Preference.
[22]	This information shall only be used in case of centralized clearance.
[23]	This information shall only be used in case the declaration for temporary storage or the customs declaration to place the goods under a special procedure other than transit is lodged at a customs office different to the supervising customs office as indicated in the respective authorization.
[24]	This information shall only be required in case of commercial transactions involving at least two Member States.
[25]	This information shall only be provided for entry into the declarants' records and only if the discharge of the goods under temporary storage concerns only parts of the declaration for temporary storage lodged previously in relation with the goods concerned.
[26]	This data element is an alternative to the Commodity code when it is not provided.
[27]	This data element can be provided to identify goods covered by a notification for re-exportation of goods under temporary storage where part of the goods covered by the declaration for temporary storage concerned are not re-exported.
[28]	This data element is an alternative to the description of goods when it is not provided.
[29]	This data element is not mandatory in case the declaration type is TIR.
[30]	Member States may waive this requirement for modes of transport other than rail in case the transit movement doesn't cross the external border of the Union.
[31]	This information does not have to be provided when export formalities are carried out at the point of exit from the customs territory of the Union.
[32]	This data element does not have to be provided where the import formalities are carried out at the point of entry into the customs territory of the Union.
[33]	<p>This data element is mandatory for agricultural products with export refunds, unless they are carried by post or fixed transport installations.</p> <p><i>[In case of transport by post or fixed installations, this information shall not be required.]</i></p>

[34]	Not for use in the case of postal consignments or carriage by fixed transport installations.
[35]	Where goods are carried in multimodal transport units, such as containers, swap bodies and semi-trailers, the customs authorities may authorize the holder of the transit procedure not to provide this information where the logistical pattern at the point of departure may prevent the identity and nationality of the means of transport from being provided at the time the goods are released for transit, providing multimodal transport units bear unique numbers and such numbers are indicated in D.E. 19 07 063 000 Container identification number.
[36]	<p>In the following cases, Member States shall waive the obligation to enter this information on a transit declaration lodged at the office of departure in relation with the means of transport on which the goods are directly loaded:</p> <ul style="list-style-type: none"> - where the logistical pattern does not allow this data element to be provided and the holder of the transit procedure has the AEOC status and - where the relevant information may be traced where needed by the customs authorities via the records of the holder of the transit procedure.
[37]	Not for use in the case of postal consignments or carriage by fixed transport installations or rail.
[38]	<p>This data element is mandatory for agricultural products with export refunds unless they are carried by post, fixed transport installations, or rail.</p> <p><i>[In case of transport by post, fixed installations or rail, this information shall not be required.]</i></p>
[39]	This information shall only be required where the release of the goods is subject to the provision of a comprehensive guarantee.
[40]	The Member State of acceptance of the declaration may waive the obligation to provide this information where it is in the position to assess it correctly and has implemented calculation routines to provide a result compatible with statistical requirements.
[41]	This data element shall only be used in the context of a supplementary declaration for Entry into the declarant's records.
[42]	This data element shall only be used in the context of TIR Carnet.
[43]	Each goods item number must be unique throughout the consignment (master level). The items shall be numbered in a sequential fashion, starting from 1 for the first item and incrementing the numbering by 1 for each following item.
[44]	Each goods item number must be unique throughout the consignment (house level). The items shall be numbered in a sequential fashion, starting from 1 for the first item and incrementing the numbering by 1 for each following item.
[45]	<p>This information shall be provided either at consignment or consignment/goods item level.</p> <p>Where the same information is applicable to all goods items of the same consignment it shall be provided at consignment level only.</p>
[46]	EORI number shall be declared.
[47]	Where an EORI number or third country unique identification number (TCUIN) was assigned, it shall be declared.
[48]	At least one of the following shall be declared: Estimated date and time of arrival (D.E. 15 03 000 000); transport document (D.E. 12 05 000 000) or previous document (D.E. 12 01 000 000). In maritime traffic in addition the entry key may be used.
[49]	In the address either street and number or P.O. box is to be declared.
[50]	This data element does not need to be provided where the declaration is lodged prior to departure.

[51]	This information shall only be provided when the declaration is amended.
[52]	This information can be provided alternatively on master consignment or on house consignment level upon referral request.
[53]	This information can be provided alternatively on master consignment item or on house consignment item level.
[54]	<p>This information is not required:</p> <ul style="list-style-type: none"> a) when the goods are declared for release for free circulation under the special scheme for distance sales of goods imported from third countries and territories set out in Title XII Chapter 6 Section 4 of Directive 2006/112/EC; or b) when the goods are of a non-commercial character sent from a third country by private persons to other private persons in a Member State and exempt from VAT pursuant to Article 1 of Council Directive 2006/79/EC (1).
[55]	This information is only required when the goods are declared for release for free circulation under the special scheme for distance sales of goods imported from third countries and territories set out in Title XII Chapter 6 Section 4 of Directive 2006/112/EC.
[56]	This information is only required if the declaration concerns goods referred to in Article 27 of Council Regulation (EC) No 1186/2009.
[57]	This information is not required in cases of multiple goods packed together and for postal consignments.
[58]	For Centralized Clearance at Import where more than one MS is involved, the information relating to the national codes shall be provided for the Authorizing and Presentation MS.
[59]	When this data element is used at least either the code or text shall be provided.
[60]	This data element is to be provided when an authorization exists according to the relevant section of Annex A to this Regulation, Title I Chapter 1.
[61]	This data element is optional when the declaration is submitted prior to presentation of goods.
[62]	This information shall relate to the situation at the moment when the declaration is made.
[63]	This information shall be provided for decisions relating to binding information.
[64]	The gross mass on item level does not need to be declared if the total gross mass is declared on "MC" or "HC" level.
[65]	This information shall only be provided when customs authority decided to seal the goods.
[66]	EORI number or third country unique identification number (TCUIN) shall be declared, where available.
[67]	This information shall be required when Region of dispatch is provided.
[68]	This information shall not be provided in the case of a pre-lodged declaration.
[69]	This information shall only be provided when codes are defined by the Member State concerned.
[70]	Not for use in the case there is no Customs office of transit (17 04 000 000) declared.
[71]	This information shall not be provided if it is the same as the Departure transport means (19 05 000 000).

[72]	Member States may waive this obligation if their systems allow them to deduce this information automatically and unambiguously from information elsewhere in the declaration.
[73]	This information shall be provided in the case of end-use authorization.
[84]	This information shall not be provided where it relates to a customs declaration in postal traffic for release for free circulation.
[85]	This information shall not be provided where it relates to a customs declaration for release for free circulation in respect of a consignment which benefits from a relief from import duty in accordance with Article 23(1) or Article 25(1) of Regulation (EC) No 1186/2009.

EUCDM 6.1	XSD/XML-name					Format	M/O	Comment			
None	ID						an18		MC		
Description:											
The MRN is automatically generated following the EUCDM legislation as a unique combination of 18 characters. The MRN is created by the Customs agency and is sent as part of the validation acceptance.											
Rules/codes/other relevant information:											
This element is used in all declarations and only used in the following additional messages: correction, amendment, invalidation, invalidation and repayment remission (4c), repayment remission, goods presentation, and supplementary declarations.											
The combination of the 18 characters is as follows: <ul style="list-style-type: none">- The last two digits of the year of formal acceptance of the declaration (e.g., '23' for 2023)<ul style="list-style-type: none">- Consist of 2 digits- 2. Country where the declaration/proof of the customs status of union goods/notification is lodged (e.g., 'DK' for Denmark)<ul style="list-style-type: none">- Consist of 2 letters- 3. Unique identifier based on year and country (e.g., 21DK04K21L01)<ul style="list-style-type: none">- Consist of 12 alphanumeric characters- 4. Procedure identifier (see tables below)<ul style="list-style-type: none">- Consist of 1 letter- 5. Check digit (e.g., '6')<ul style="list-style-type: none">- Consist of 1 alphanumeric character											
The following table explains what the digit for the procedure identifier will be:											
Code	Procedures					Declarations					
R	Import					H1, H2, H3, H4, H6, H7, I1					
V	Import					H5					
U	Temporary storage					G3,G4					
Z	Notification of arrival					G2, G5					
8	Import – Presentation of goods					I2EIDR

Declaration type/Additional declaration type

C/A	Requirement Overview										XSD-path
	H1	H2	H3	H4	H5	H6	H7	I1	I2	I2_EID R	
No/No	M DL	M DL	M DL	M DL	M DL	M DL	M DL	M DL	M DL	n/a	Basepath: Declaration/ TypeCode
EUCDM 6.1	XSD/XML-name						Format	M/O	Comment		
11 01 001 000	TypeCode (declaration type)						an..5	M	CL10034 (for additional messages: CL10183)		
11 02 001 000	TypeCode (additional declaration type)						a1	M	CL10214 (for additional messages: CL10183)		
Description:											
Indicates what type of action is intended: submission of a pre-lodged/standard, a correction/amendment request or an invalidation/invalidation and repayment request.											
Rules/codes/other relevant information:											
For declarations this data element is a concatenation of 11 01 001 000 – Declaration type and 11 02 001 000 – Additional declaration type. For the additional messages this is considered a system specific field. For Codelist information, see codelist excel sheet found on GitHub .											
For standard declarations:											
Example:											
For Declaration type ‘IM’ and Additional Declaration Type ‘A’, the input for the data element is ‘IMA’											
For pre-lodged declarations:											
Example:											
For Declaration type ‘IM’ and Additional Declaration Type ‘D’, the input for the data element is ‘IMD’											
For additional messages:											
The codes to declare in this field for additional messages :											
<ul style="list-style-type: none"> - ‘COR’ for sending a correction or amendment request to an already existing declaration - ‘INV’ for sending an invalidation or invalidation and repayment request to an already existing declaration - ‘RRA’ for sending a repayment and remission request to an already existing declaration - ‘GPR’ for presenting goods to an already existing pre-lodged declaration - ‘SUP’ for supplementing a simplified export declaration 											
See the list of explanations in Bilag in the section called “Fælles stamdataliste” on the page https://skat.dk/data.aspx?oid=3064											
Or on EUCDM, using the ID6 number as search: https://eucdm.softdev.eu.com/Archive/EUCDM%206.1/EN/EUCDM/Annex-B/e21.htm											
XML-examples:											
<code><ns3:TypeCode>IMA</ns3:TypeCode></code> --- for submitting an IMA											
<code><ns3:TypeCode>IMD</ns3:TypeCode></code> --- for submitting an IMD											
<code><ns3:TypeCode>COR</ns3:TypeCode></code> --- for submitting a correction/amendment request											
<code><ns3:TypeCode>INV</ns3:TypeCode></code> --- for submitting an invalidation or invalidation 4c											
<code><ns3:TypeCode>RRA</ns3:TypeCode></code> --- for submitting a repayment and remission request											
<code><ns3:TypeCode>GPR</ns3:TypeCode></code> --- for presenting goods declared on a pre-lodged declaration											
<code><ns3:TypeCode>SUP</ns3:TypeCode></code> --- for supplementing a simplified declaration											

Goods item number

C/A	Requirement Overview										XSD-path

None	SequenceNumeric					n..5	M				
11 10 001 000	CurrentCode – [2]					an3	M	Code representing the additional procedure requested. CL10027			
Description:											
The additional procedure for which the goods are declared. Additional procedure is created re-using the ‘GovernmentProcedure’ element, but use only currentCode instead of having both CurrentCode and PreviousCode.											
Rules/codes/other relevant information:											
It is mandatory to declare at least one additional procedure but up to two additional procedures can be declared.											
Additional procedure (11 10 000 000):											
Fill in the additional procedure code.											
Valid combinations for requested and previous procedures together with additional procedures can be found here: https://info.skat.dk/data.aspx?oid=2229597&vid=219250											
For Codelist information, see codelist excel sheet found on GitHub .											
For 11 10 001 000 footnote [2] applies to I1 declarations.											
XML-examples:											
<pre> <ns3:GovernmentProcedure> <ns3:SequenceNumeric>2</ns3:SequenceNumeric> <ns3:CurrentCode>000</ns3:CurrentCode> </ns3:GovernmentProcedure> </pre>

Description:											
Information relating to a previous document.											
Rules/codes/other relevant information:											
If one subfield is filled, all subfields must be filled. For relevant codes to fill in TypeCode , see: toldst.dk/erhverv/blanketter-og-koder/koder											
SequenceNumeric:											
To refer multiple documents, repeat this element the required number of times and fill here sequentially starting at 1.											
TypeCode (12 01 003 000):											
For Codelist information, see codelist excel sheet found on GitHub											
LineNumeric (12 01 007 000):											
Enter the sequential number of the item in the supporting document (e.g., certificate, license, permit, entry document etc.), corresponding to the item in question. This element is not allowed in H6 and H7 declarations.											
TypeCode (12 01 002 000):											
For Codelist information, see codelist excel sheet found on GitHub											
For 12 01 002 000 footnote [58] applies to H1, H2, H3, H4, H5, I1, and I2 declarations.											
Reference number (12 01 001 000):											
Can be found here, https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:02015R2447-20210315&qid=1666165195727&from=en on page 314 under “12 01 001 000 Reference Number”											

AcceptanceDateTime (15 09 001 000):

This element is **mandatory** for **I2 EIDR** and **not I2**

unitCode (12 01 005 000)

UnitCode Is an attribute of the element QuantityQuantity.

For Codelist information, see codelist excel sheet found on [GitHub](#)

Description:											
Use this data element to include information for which no field is specified by Union legislation.											
Rules/codes/other relevant information:											
This element can be used to declare an SE number , other guarantee forms , or other information for which no field is specified.											
Optional to declare and can be declared on GoodsShipment level or GoodsItem level or both.											
If given on GoodsShipment level (GSL) the information applies to all the goods items in the declaration.											
If given on GoodsItem level (GIL) the information applies to only the goods items which it is declared under.											
SequenceNumeric:											
There can be declared multiple additional documents. Number them sequentially here.											
StatementCode (12 02 008 000):											
For Codelist information, see codelist excel sheet found on GitHub											
For 12 02 008 000 footnote [58] applies to H1, H2, H3, H4, H5, I1, and I2 declarations.											
StatementDescription (12 02 009 000):											
A short description of the additional information.											
If statement code relates to SE number , then this field must (only) contain the SE number .											
If statement code relates to an “ other guarantee form ”, then this must contain information or identification of that guarantee.

Description:											
Each instance of this class is to be used for a single occurrence of duty, tax or fee.											
Rules/codes/other relevant information:											
AdValoremTaxBaseAmount (14 03 040 014): Enter the amount. This element can be estimated.											
SpecificTaxBaseQuantity (14 03 040 006): Enter quantity concerned. This data element can be estimated on a supplementary declaration for C1 declarations.											
For 14 03 040 042 footnote [11] applies to H1, H3, H4 , and H5 declarations, and footnote [12] applies to H1 and H5 declarations.											
Tax (14 03 040 043): Enter the calculated/separate tax amount of duties and/or taxes for each tax base, for the cases when more than one tax base per tax type exist. For 14 03 040 043 footnote [11] applies to H1, H3, H4 , and H5 declarations.											
TaxRateNumeric (14 03 040 041): Enter the rates for each of the duties and taxes of application. For 14 03 040 041 footnote [11] applies to H1, H3, H4 , and H5 declarations, and footnote [12] applies to H1 and H5 declarations.											
TypeCode (14 03 039 000): There are the following TypeCodes in the table below. However, the different countries can create custom National Codes which also applies for those countries, they consist of n1an2. For Codelist information, see codelist excel sheet found on GitHub For 14 03 039 000 footnotes [12] , [13] , and [58] apply to H1, H3, H4 , and H5 declarations.											

MethodCode (14 03 038 000):

For Codelist information, see codelist excel sheet found on [GitHub](#)

For **14 03 038 000** footnote [11] applies to **H3, H4, and H5** declarations, and footnote [12] applies to **H1 and H5** declarations.

TaxAssessedAmount (14 16 001 000):

Total duties and taxes amount

PaymentAmount (14 03 042 000):

Enter amount for each of the duties and taxes applicable.

For **14 03 042 000** footnote [11] applies to **H3, H4, and H5** declarations, and footnote [12] applies to **H1 and H5** declarations.

16 08 001 000		TypeCode					a2	M			
Description:											
The country from which goods were initially dispatched.											
Rules/codes/other relevant information:											
The element origin contains info about the country of origin and info about the preferential country of origin which must be filled out under certain circumstances. The latter is only mentioned under the table Country of preferential origin . For this version of origin, the union code of the country of origin is entered.											
SequenceNumeric: Indicates the number of this element in the sequence of Origin elements. Must be given sequentially. Starts at 1. As there can only be at maximum of two country of origin, it will always be 1 or 2.											
CountryCode (16 08 001 000): For Codelist information, see codelist – Import excel sheet found on GitHub For 16 08 001 000 footnote [20] applies to H1, H3, H4, H5, and I1 declarations, and footnote [2] applies to I1 declarations. Note: Uses a different code list in preferential country of origin .											
TypeCode (16 08 001 000): If a preferential treatment is requested based on the origin of the goods in data element Preference (14 11 000 000) the Specify '1' for country of origin and '2' for country of preferential origin.											
XML-examples:											
Only info on country of origin is needed: <ns3:Origin> <ns3:SequenceNumeric>1</ns3:SequenceNumeric> <ns3:CountryCode>NO</ns3:CountryCode> <ns3:TypeCode>1</ns3:TypeCode> </ns3:Origin>											
Info on country of origin and preferential country of origin is needed: <ns3:Origin> <ns3:SequenceNumeric>1</ns3:SequenceNumeric> <ns3:CountryCode>NO</ns3:CountryCode> <ns3:TypeCode>1</ns3:TypeCode> </ns3:Origin> <ns3:Origin> <ns3:SequenceNumeric>2</ns3:SequenceNumeric> <ns3:CountryCode>1032</ns3:CountryCode> <ns3:TypeCode>2</ns3:TypeCode>											

</ns3:Origin>

Origin (Country of preferential origin)

Description:

The country from which goods were initially dispatched.

Rules/codes/other relevant information:

The element origin contains info about the **country of origin** and info about the **country of preferential origin** which must be filled out under certain circumstances. The first is only mentioned under the table **country of origin**.

This version of origin is used when a preferential treatment is requested in element **Preference (14 11 000 000)** based on the origin of the goods. The union code of the country or region/group of countries which is preferred.

SequenceNumeric:

Indicates the number of this element in the sequence of Origin elements. Must be given sequentially. Starts at 1. As there can only be at maximum of two country of origin, it will always be 1 or 2.

CountryCode (16 06 001 000):

For Codelist information, see codelist - Import excel sheet found on [GitHub](#)

Note: Uses a different code list in **country of origin**.

TypeCode (16 08 001 000):

Specify '1' for country of origin and '2' for country of preferential origin.

XML-examples:

Only info on preferential country of origin is needed:

```
<ns3:Origin>
  <ns3:SequenceNumeric>1</ns3:SequenceNumeric>
  <ns3:CountryCode>1032</ns3:CountryCode>
  <ns3:TypeCode>2</ns3:TypeCode>
</ns3:Origin>
```

Info on country of origin and preferential country of origin is needed:

```
<ns3:Origin>
  <ns3:SequenceNumeric>1</ns3:SequenceNumeric>
  <ns3:CountryCode>NO</ns3:CountryCode>
  <ns3:TypeCode>1</ns3:TypeCode>
</ns3:Origin>
<ns3:Origin>
  <ns3:SequenceNumeric>2</ns3:SequenceNumeric>
  <ns3:CountryCode>1032</ns3:CountryCode>
  <ns3:TypeCode>2</ns3:TypeCode>
```

</ns3:Origin>

Description:											
Information about the place where the goods are located.											
Rules/codes/other relevant information:											
Using the relevant codes, enter the location where the goods may be examined. This location shall be precise enough to allow customs to carry out the physical control of the goods.											
The type of location, and how it is declared, is given by the fields: TypeCode and IdentificationType. For declaring the location of goods there are predefined codes for indicating the type of location and how it is declared with specific possible values and combinations:											
CountryCode (16 15 018 020):											
For Codelist information, see codelist - Import excel sheet found on GitHub											
TypeCode (16 15 045 000)											
This TypeCode Indicates the type of location where the goods will be presented. Only one Type is to be used at the same time.											
For Codelist information, see codelist - Import excel sheet found on GitHub											
The TypeCodes and their types of locations are:											
- 'A': Designated place											

- 'B': Authorised place
- 'C': Approved place
- 'D': Other

IdentificationType (16 15 046 000):

Indicates how the location will be declared:

- 'U': UN/LOCODE
- 'V': Customs Office ID
- 'W': GNSS coordinates
- 'X': EORI number
- 'Y': Authorisation number
- 'Z': Free text
- 'T': Postal code

The valid combinations for the two fields are:

- 'A' and 'U': Designated place identified by UN/LOCODE (e.g., DKCPH-0011 for Copenhagen - Langelinje)
- 'A' and 'V': Designated place identified by Customs Office ID (e.g., DK007900 for Skattecenter København)
- 'B' and 'Y': Authorised place identified by Authorisation number.
- 'C' and 'Z': Approved place identified by filling in the address fields.
- 'D' and 'Z': Other place identified by filling in the address fields.
- 'D' and 'W': Other place identified by GNSS coordinates.
- 'D' and 'X': Other place identified by an EORI number.
- 'D' and 'T': Other place identified by a postal code.

Name (16 15 036 000 UN/LOCODE)

For Codelist information, see codelist excel sheet found on [GitHub](#). Should only be filled when IdentificationType = 'U'.

ID (16 15 053 000):

What to fill in this field is given by the Type of location, meaning that if:

- IdentificationType = 'U': this field should not be filled.
- IdentificationType = 'V': this field should not be filled.
- IdentificationType = 'W': this field should not be filled.
- IdentificationType = 'X': this field can be filled with an additional identifier to the EconomicOperator element. The EORI number itself should be filled in the identification field of the EconomicOperator element.
- IdentificationType = 'Z' this field should not be filled.

The following subelements of **Address (16 15 018 00)** should be filled when IdentificationType = 'Z':

CityName (16 15 018 022):

City name of the location of goods.

CountryCode (16 15 018 020):

For Codelist information, see codelist excel sheet found on [GitHub](#)

Line (16 15 019 00):

Street name and street number of the location of goods.

PostCodeID (16 15 018 020):

Post code of the location of goods.

The following subelements of **Address (16 15 018 00)** should be filled when IdentificationType = 'T':

CountryCode (16 15 081 020):

For Codelist information, see codelist excel sheet found on [GitHub](#).

PostCodeID (16 15 081 021):

Post code of the location of goods.

streetNumber (16 15 081 025):

Street name and street number of the location of goods.

authorisationReferenceNumber (16 15 052 000):

Authorisation number. Should only be filled when IdentificationType = 'Y'.

CustomsOffice (16 15 047 000):

Identification (16 15 047 001):

Customs Office ID (e.g., DK007900).
 Should only be filled when IdentificationType = 'V'.
 See the list of Customs Office ID's here:
https://ec.europa.eu/taxation_customs/dds2/rd/rd_consultation_location.jsp?Lang=en

Latitude (16 15 048 049):

Latitude coordinate of the location of goods.
 Should only be filled when IdentificationType = 'W'.

Longitude (16 15 048 050):

Longitude coordinate of the location of goods.
 Should only be filled when IdentificationType = 'W'.

EconomicOperator (16 15 051 000):

identification:

EORI number of Economic Operator.
 Should only be filled when IdentificationType = 'X'.

18 01 000 000		GoodsMeasure					n/a	M			
18 01 001 000		NetNetWeightMeasure					n..16,6	M	Net mass		
Description:											
Details about the goods weight, quantities, and amounts.											
Rules/codes/other relevant information:											
The net mass must contain the weight of the goods concerned with the relevant declaration goods item. The weight must be expressed in kilograms and should be the weight of the goods without the packaging.											
Note:											
Where a net mass greater than 1 kg includes a fraction of a unit (kg), it may be rounded off in the following manner: — from 0,001 to 0,499: rounding down to the nearest kg, — from 0,5 to 0,999: rounding up to the nearest k A net mass of less than 1 kg should be entered as '0,' followed by a number of decimals up to 6, discarding all "0" at the end of the quantity (e.g. 0,123 for a package of 123 grams, 0,00304 for a package of 3 grams and 40 milligrams or 0,000654 for a package of 654 milligrams).											
GoodsMeasure (18 01 000 000):											
This element is allowed to be supplemented and estimated. As seen in the XML-example below, this field shall not be filled out, but the child element NetNetWeightMeasure shall.											
NetNetWeightMeasure (18 01 001 000):											
For 18 01 001 000 footnote [24] applies to H5 declarations, and footnote [2] applies to I1 declarations.											
XML-examples:

Description:											
Details about the goods weight, quantities, and amounts.											
Rules/codes/other relevant information:											
If necessary, this field can be used to enter the quantity of the item in question. It should be expressed using the unit defined by Union legislation as published in TARIC.											
Supplementary Units (18 02 000 000):											
For Codelist information, see codelist – Import excel sheet found on GitHub .											
This element is allowed to be supplemented and estimated.											
As seen in the XML-example below, this field shall not be filled out, but the child element TariffQuantity shall.											
For 18 02 000 000 and 18 02 001 000 footnote [24] applies to H5 declarations, footnote [56] applies to H7 declarations, and footnote [2] applies to I1 declarations.											
XML-examples:											
<pre> <ns3:GoodsMeasure> <ns3:NetNetWeightMeasure unitCode="KGM">30000.00</ns3:NetNetWeightMeasure> <ns3:TariffQuantity unitCode="NAR">100.000</ns3:TariffQuantity> </ns3:GoodsMeasure> </pre>											

Goods Measure (Gross Mass)

C/A	Requirement Overview										XSD-path
	H1	H2	H3	H4	H5	H6	H7	I1	I2	I2_EIDR	
Yes/Yes	M GSL GIL	M GSL GIL	M GSL GIL	M GSL GIL	M GSL GIL	M GSL	M GSL GIL	M GSL GIL	n/a	M GSL GIL [25]	GSL: Declaration/GoodsShipment/ GoodsMeasure GIL: Declaration/GoodsShipment/GovernmentAgencyGoodsItem/Commodity/ GoodsMeasure
EUCDM 6.1		XSD/XML-name					Format		M/O	Comment	
18 04 000 000		GoodsMeasure					n/a		M		
18 04 001 000		GrossMassMeasure					n..16,6		M	Gross mass.	

Description:

Details about the goods weight, quantities, and amounts.

Rules/codes/other relevant information:

The gross mass is the weight of the goods including packaging but excluding the carrier's equipment for the declaration.

Note:

Where a gross mass greater than 1 kg includes a fraction of a unit (kg), it may be rounded off in the following manner:

- from 0,001 to 0,499: rounding down to the nearest kg,
- from 0,5 to 0,999: rounding up to the nearest kg.

A gross mass of less than 1 kg should be entered as '0,' followed by at least one decimal and up to at most 6 decimals, discarding all "0" at the end of the quantity (e.g. 0,123 for a package of 123 grams, 0,00304 for a package of 3 grams and 40 milligrams or. 0,000654 for a package of 654 milligrams).

When the weight of the pallets is included in the transport documents, the weight of the pallets shall also be included in the calculation of the gross mass, except for the following cases:

- a) The pallet forms a separate item on the customs declaration.
- b) The duty rate for the item in question is based on the gross weight and/or the tariff quota for the item in question is managed in measurement unit 'gross weight'.

Where the declaration comprises several goods items, which concern goods that are packed together in such a way that it is impossible to determine the gross mass of the goods pertaining to any goods item, the total gross mass needs only to be entered on header level.

GoodsMeasure (18 04 000 000):

This element is allowed to be supplemented and estimated.

As seen in the XML-example below, this field shall not be filled out, but the child element **GrossMassMeasure** shall. Also this field and its child element are the only elements inside **GoodsMeasure** (18 02 000 000) on GSL.

GrossMassMeasure (18 04 001 000):

For **18 04 000 000** and **18 04 001 000** footnote [25] applies to **I2_EIDR** declarations.

XML-examples:

On GSL:

```
<ns3:GoodsMeasure>  
  <ns3:NetNetWeightMeasure unitCode="KGM">30000.00</ns3:NetNetWeightMeasure>  
  <ns3:TariffQuantity unitCode="NAR">100.000</ns3:TariffQuantity>  
</ns3:GoodsMeasure>
```

On GIL:

```
<ns3:GoodsMeasure>  
  <ns3:TariffQuantity unitCode="NAR">100.000</ns3:TariffQuantity>  
</ns3:GoodsMeasure>
```

Description of goods

18 06 054 000	MarksNumbersID						an..512	M	Shipping marks. Is optional for H2 and I1. Not present for H6, H7 and I2 EIDR		
Description:											
Details related to packaging.											
Rules/codes/other relevant information:											
TypeCode (18 06 003 000): Code specifying the type of package. For Codelist information, see codelist - Import excel sheet found on GitHub . For 18 06 003 000 footnote [25] , [84] and [85] applies to I2 declarations.											
QuantityQuantity (18 06 004 000): Total number of packages based on the smallest external packing unit. This is the number of individual items packaged in such a way that they cannot be divided without first undoing the packing, or the number of pieces, if unpackaged. This information shall not be provided for goods in bulk. For 18 06 004 000 footnote [25] applies to I2 declarations, and footnote [57] applies to H7 declarations.											
MarksNumberID (18 06 054 000): Free form describing the marks and numbers on the transport unit or packages. For I1 this information will only be provided for packaged goods where applicable. Where goods are containerized, the container number can replace the shipping marks, which can however be provided by the economic operator where available. A UCR or the references in the transport document that allows the unambiguous identification of all packages in the consignment may replace the shipping marks.

19 08 000 000	BorderTransportMeans					n/a	M				
19 08 062 000	RegistrationNationalityCode					a2	MC	Nationality. CL10203			
Description:											
Details of the active means of transport crossing the border of the Customs territory.											
Rules/codes/other relevant information:											
The nationality code of the active means of transport entering the union. In the case of combined transport or where several means of transport are used, the active means of transport is the one which propels the whole combination. For example, in the case of a lorry on a sea-going vessel, the active means of transport is the ship. In the case of a tractor and trailer, the active means of transport is the tractor.											
Note: This element (19 08 000 000) and element (19 03 000 000) Mode of Transport at the Border share a header name BoarderTransportMeans so the example below contains sub elements from both element (19 08 000 000) and element (19 03 000 000) .											
RegistrationNationalityCode (19 08 062 000): For Codelist information, see codelist – Import excel sheet found on GitHub .											
XML-examples:											
<pre><ns3:BorderTransportMeans> <ns3:RegistrationNationalityCode>NO</ns3:RegistrationNationalityCode> <ns3:ModeCode>5</ns3:ModeCode> </ns3:BorderTransportMeans></pre>

Description:

Customs Decision application element 8F for Customs Decision.

Rules/codes/other relevant information:

Owner of the Goods (**33 08 000 000**): Where applicable under the relevant Article, enter the name and address of the non-Union owner of the goods to be placed under the temporary admission

First Place of use or processing (**FirstPlaceOfUseOrProcessing**): Using the relevant code, enter the address of the place concerned. This information shall only be provided, if, in the context of an application for an authorisation for the use of inward processing or end-use procedures.

Place(s) of processing or use (**PlaceOfProcessingOrUse**): Using the relevant code, indicate the address of the place(s) concerned.

Customs Office(s) of discharge (**CustomsOfficesOfDischarge**): Indicate the suggested customs office(s)

Supervising customs office (**SupervisingCustomsOffice**): Indicate the competent customs office, as provided for in article 1(36).

Period for discharge (**DischargePeriod**): Enter the estimated period expressed in months needed for the operations to be carried out or use within the special customs procedure applied for.

Yield Rate (**YieldRate**): Estimated rate of yield or estimated average rate of yield, or where appropriate, the method of determining such rate.

Processed Products (**ProcessedProducts**): Enter details of all processed products resulting from the operations, indicating the main processed product and the secondary processed products which are by-products of the processing operation other than the main processed product, as appropriate.

Identification of Goods (**IdentificationOfGoods**): Enter the intended measures of identification by using at least one of the relevant codes

Economic Conditions (**EconomicCondition**): The inward or outward processing procedure can be used only where the essential interests of the Union producers would not be adversely affected by an authorisation for a processing procedure (economic conditions).

In most of the cases an examination of the economic conditions is not necessary. However, in certain cases such an examination must be carried out at Union level.

Details of Planned Activities (**DetailsOfPlannedActivities**): Describe the nature of the planned activities or use (e.g., details of the operations under a job-processing contract or kind of usual forms of handling under inward processing) to be carried out on the goods within the special procedure.

If the applicant wishes to carry out the processing of the goods under inward processing or end-use procedure in a customs warehouse, pursuant to Article 241 of the Code, he shall provide the relevant details.

Where appropriate, indicate name, address and function of other persons involved.

Additional Information (**AdditionalInformation**): Enter any additional information, if deemed helpful

Calculation of the amount of the import duty in accordance with article 86(3) of the Code (**ImportDuty**): *Application*: Indicate ('yes/no') whether the applicant wishes to calculate the import duty in accordance with Article 86(3) of the Code.

If the answer is 'no', Article 85 of the Code must be applied, which means, that the calculation of the amount of import duty is made on the basis of the tariff classification, customs value, quantity, nature and origin of the goods at the time at which the customs debt in respect of them incurred.

Decisions:

In case the holder of the authorisation wishes to calculate the import duty in accordance with Article 86(3) of the Code, the authorisation for inward processing shall provide for that the relevant processed products may not be imported directly or indirectly by the holder of the authorisation and released for free circulation within a period of one year after their re-export. However, the processed products may be imported directly or indirectly by the holder of the authorisation and released for free circulation within a period of one year after their re-export if the amount of import duty is determined in accordance with Article 86(3) of the Code.

Description:

Authorization code type for application element 4c for remission and repayment.

Rules/codes/other relevant information:

ApplicationCodeType **(31 01 000 002)**: Authorization code type for application.

ApplicationSignature **(31 02 000 202)**: Authorization signature for application.

DecisionReferenceNumber **(31 06 000 000)**: Unique reference attributed by the competent customs authority to the decision.

AttachedDocument **(32 04 000 000)**: Document(s) attached to the application or the decision. Multiple instances of this element can be used if more than one document needs to be attached.

ApplicationHolder **(33 01 000 000)**: Applicant of the authorisation which includes applicants name and address.

ApplicationHolderId **(33 01 000 229)**: The application holders ID provided as an EORI number.

ApplicationSupervisor **(33 06 000 000)**: Contact details of person responsible for the application.

ApplicationDate **(34 02 000 207)**: Date on which the applicant has signed or otherwise authenticated the application.

DecisionDate **(34 02 000 207)**: The date on which the authorization or decision relating to binding information or on the repayment or remission of import or export duty was taken.

General Remarks **(36 03 000 009)**: General remarks regarding particulars of any requirements to which the goods remain subject pending implementation of the decision. If applicable, the decision shall contain a notice informing the holder of the decision that he must give the original of the decision to the implementing customs office of his choice when presenting the goods.

Representative **(33 03 000 000)**: Name and address of Repayment/Remission representative.

Customs Office Notified **(48 02 000 301)**: Customs office where the customs debt was notified.

Customs Office Location **(48 03 000 301)**: Customs office responsible for the place where the goods are located.

Customs Office Comments **(48 04 000 309)**: Comments of the customs office responsible for the place where the goods are located.

Customs Procedure **(48 05 000 000)**: Customs procedure (request for prior completion of formalities).

Amount Duty **(48 07 000 000)**: Amount of import or export duty to be repaid or remitted of.

Duty Type **(48 08 000 000)**: Type of import or export duty.

Goods Destination **(48 10 000 009)**: Use or destination of goods.
