The aim of this document

1

The aim of this document is to give an in-depth description of the different fields and data elements contained in the XSD-files for Temporary Storage declarations based on the EU Customs Data Model - <https://eucdm.softdev.eu.com/>

The document is structured after the EUCDM grouping of the data elements as well as DMS-specific data fields that are required by the system when using the S2S solution:

- **System-specific fields:** This section includes fields that are needed by the system to recognize what declaration is sent in, who is submitting the declaration, as well other data that is needed to fulfill the desired action.
- **Group 11:** This section contains basic information about the declaration and which procedures the declaration should be processed under. All this information influences how the declaration is processed, what kind of business scenario and procedure to be expected and requested.
- **Group 12:** This section is for the submitter to present all other relevant information and documents related to the submitted declaration that is not contained in the data fields. This is especially used for references tracking documents, authorizations and supplying tracking numbers.
- **Group 13:** This section contains information on all parties involved in the Import procedure. It is here information on the importer, exporter, declarant, fiscal reference, representative, etc., is provided either by ID or other identifiable information depending on whether the party is a company or private person.
- **Group 15:** This section contains information related to the Estimated date and time arrival at the port of unloading
- **Group 16:** This section contains the location-related information, e.g., where the goods will be or are presented (depending on whether it is a pre-lodged or a standard declaration) as well as the countries involved in the export/exit process.
- **Group 17:** This section contains information regarding which customs offices have handled the goods in the export/exit process.
- **Group 18:** In this section the submitter supplies more detailed information on the goods item(s) such as a weight, description, Taric code(s), etc.
- **Group 19:** This section contains information about the form of transport of goods, e.g., modes, container information, equipment, etc.

Under each data element in the groups is provided a detailed description on whether the field is mandatory or optional as well as what rules to adhere to depending on the desired business scenario to make use of, and XML-examples are provided to give context.

Information on the EUCDM ID6 reference code is provided to help the reader in seeking further information if needed.

Additionally, under some of the data element you will see codelist or rulecode codes identifying codes and rules for this element. These elements are relevant under the transitional period of the new system, and you can identify them in the Codelists.xlsx or Rulecodelist.xlsx sheets found on [GitHub](#). The first document can be used to identify the CLxxx errors, and the second document can be used to identify the rest. If there is an error not presented in comments of the data elements, or you can not find it in the code-/rulecodelist sheets, please contact the Danish Customs Agency for further assistance on the subject.

Glossary

2

To make the document shorter and easier to read, some abbreviations are used. Here is a list of the abbreviations used in this document.

Abbreviation	Description	Details
M	Mandatory	The field is mandatory to declare.
O	Optional	The field is optional to declare or should only be declared if relevant information is available.
MC	Conditionally mandatory	The information is mandatory dependent on other information given in the declaration, e.g., type of declaration or commodity code.
DL	Declaration level	The information is given on header level and applies to all the goods items in the declaration.
MCL	Master consignment level	The information is given on master consignment level and applies to all the goods items on this level.
MIL	Master item level	The information is given on master item level ...
HCL	House consignment level	
HIL	House item level	
C/A	Defines whether an element can be corrected or amended	Yes/Yes means can be corrected and amended. Yes/No means it can be corrected but not amended No/Yes means it can't be corrected but it can be amended No/No means it can't be corrected or amended
EUCDM	European Union Customs Data Model	The European Union Customs Data Model (EUCDM) is the model for Customs trans-European systems such as NCTS, AES, ICS, EOS and for Member States national customs clearance systems
XSD	XML Schema Definition	A document that specifies how to formally describe the elements in an Extensible Markup Language (XML) document. This description can be used to verify that each item of content in a document adheres to the description of the element in which the content is to be placed.
XML	Extensible Markup Language	A simple text-based format for representing structured information, storing, and sending data. It is the file format used to send declarations to DMS.
n/a	Not Applicable	The information does not apply to the given element/declaration.
Requirement Overview	Mandatory / Optional / Conditionally mandatory / Levels / Rules	Defines whether an element is M, O, MC (see abbreviations above) or whether any EUCDM rules apply to the given element in a specific declaration.
M/O	Defines whether a field is mandatory or optional when the main field is in the XML Mandatory/Optional	For a lot of input fields, the sub elements of that field are not always mandatory even though the overall input field is. For example, is Supporting Document which is optional, but when put into to an XML, SequenceNumeric and ID becomes mandatory as the only elements.
ND	Not Determined	The mandatory or optional status of these elements are not yet determined.

Footnotes

3

Throughout the XML-Guide you will see several footnotes, all of these refers to this table. All these footnotes can also be found on EUCDM.

FOOT-NOTE	DESCRIPTION
[1]	This information shall not be required in case a customs declaration has been lodged prior to the presentation of the goods pursuant to Article 171 of the Code
[2]	In the cases where Article 166(2) of the Code (simplified declarations based on authorisations) is applicable, Member States may waive the obligation to provide this information where the conditions prescribed in the authorisations associated with the procedures concerned allow them to defer the collection of this data element in the supplementary declaration.
[3]	This element is an alternative to the unique consignment reference number [UCR] when the latter is not available. It provides a link to other useful sources of information.
[4]	This information needs to be provided only where Article 166(2) of the Code (simplified declarations based on authorisations) is applicable; in this case, it is the number of the authorisation for simplified procedure. However, this data element can also contain the transport document number concerned.
[5]	This information is only required where the declaration of placing of goods under a customs procedure is used to discharge a customs warehousing procedure.
[6]	Where the EORI number or a third country unique identification number recognised by the Union is provided, the name and address shall not be provided.
[7]	The Holder of the transit procedure Identification number is mandatory only in the cases where the EORI number or a third country unique identification number recognised by the Union of the person concerned is not provided. Where the EORI number or a third country unique identification number recognised by the Union is provided, the name and address shall not be provided. The TIR Holder identification number is mandatory in case the Declaration type is TIR; otherwise, it cannot be used.
[8]	This information shall only be provided where available.
[9]	This information shall not be provided in respect of cargo remaining on board (FROB) or transhipped cargo for which the destination is located outside the Customs territory of the Union.
[10]	Member States may waive this information as far as it relates to the customs value, in situations where the customs value of the goods in question cannot be determined under the provisions of Article 70 of the Code.***
[11]	This information is not to be provided when customs administrations calculate duties on behalf of economic operators on the basis of information elsewhere in the declaration. It is otherwise optional for the Member States.
[12]	This information is not required for goods eligible for relief from import duties, unless the customs authorities consider it necessary for the application of the provisions governing the release for free circulation of the goods concerned.
[13]	This information is not to be provided when customs administrations calculate duties on behalf of economic operators on the basis of information elsewhere in the declaration.
[14]	Except where it is essential for the correct determination of the customs value, the Member State of acceptance of the declaration shall waive the obligation to provide this information, - where the customs value of the imported goods in a consignment does not exceed EUR 20.000 provided that they do not constitute split or multiple consignments from the same consignor to the same consignee, or - where the importation is of a non-commercial nature or - in case of continuing traffic in goods supplied by the same seller to the same buyer under the same commercial conditions.
[15]	Member States may require this information only in cases when the rate of exchange is fixed in advance by a contract between the parties concerned.
[16]	For completion only where Union legislation so provides.

[17]	This information shall only be required where the simplified declaration is not lodged together with an exit summary declaration.
[18]	This data element is mandatory for agricultural products with export refunds.
[19]	This data element is mandatory for agricultural products subject to refunds and for those goods which Union legislation requires the origin of the goods in the context of trade with special fiscal territories.
[20]	
[21]	This information is required where a preferential treatment is applied using the appropriate code in D.E. 14 11 000 000 Preference.
[22]	This information shall only be used in case of centralised clearance.
[23]	This information shall only be used in case the declaration for temporary storage or the customs declaration to place the goods under a special procedure other than transit is lodged at a customs office different to the supervising customs office as indicated in the respective authorisation.
[24]	This information shall only be required in case of commercial transactions involving at least two Member States.
[25]	This information shall only be provided for entry into the declarants records and only if the discharge of the goods under temporary storage concerns only parts of the declaration for temporary storage lodged previously in relation with the goods concerned.
[26]	This data element is an alternative to the Commodity code when it is not provided.
[27]	This data element can be provided to identify goods covered by a notification for re-exportation of goods under temporary storage where part of the goods covered by the declaration for temporary storage concerned are not re-exported.
[28]	This data element is an alternative to the description of goods when it is not provided.
[29]	This data element is not mandatory in case the declaration type is TIR.
[30]	Member States may waive this requirement for modes of transport other than rail in case the transit movement doesn't cross the external border of the Union.
[31]	This information does not have to be provided when export formalities are carried out at the point of exit from the customs territory of the Union.
[32]	This data element does not have to be provided where the import formalities are carried out at the point of entry into the customs territory of the Union.
[33]	This data element is mandatory for agricultural products with export refunds, unless they are carried by post or fixed transport installations. [In case of transport by post or fixed installations, this information shall not be required.]
[34]	Not for use in the case of postal consignments or carriage by fixed transport installations.
[35]	Where goods are carried in multimodal transport units, such as containers, swap bodies and semi trailers, the customs authorities may authorise the holder of the transit procedure not to provide this information where the logistical pattern at the point of departure may prevent the identity and nationality of the means of transport from being provided at the time the goods are released for transit, providing multimodal transport units bear unique numbers and such numbers are indicated in D.E. 19 07 063 000 Container identification number.
[36]	In the following cases, Member States shall waive the obligation to enter this information on a transit declaration lodged at the office of departure in relation with the means of transport on which the goods are directly loaded: - where the logistical pattern does not allow this data element to be provided and the holder of the transit procedure has the AEOC status and - where the relevant information may be traced where needed by the customs authorities via the records of the holder of the transit procedure.
[37]	Not for use in the case of postal consignments or carriage by fixed transport installations or rail.
[38]	This data element is mandatory for agricultural products with export refunds unless they are carried by post, fixed transport installations, or rail. [In case of transport by post, fixed installations or rail, this information shall not be required.]
[39]	This information shall only be required where the release of the goods is subject to the provision of a comprehensive guarantee.
[40]	The Member State of acceptance of the declaration may waive the obligation to provide this information where it is in the position to assess it correctly and has implemented calculation routines to provide a result compatible with statistical requirements.
[41]	This data element shall only be used in the context of a supplementary declaration for Entry into the declarants records.

[42]	This data element shall only be used in the context of TIR Carnet.
[43]	Each goods item number must be unique throughout the consignment (master level). The items shall be numbered in a sequential fashion, starting from 1 for the first item and incrementing the numbering by 1 for each following item.
[44]	Each goods item number must be unique throughout the consignment (house level). The items shall be numbered in a sequential fashion, starting from 1 for the first item and incrementing the numbering by 1 for each following item.
[45]	This information shall be provided either at consignment or consignment/goods item level. Where the same information is applicable to all goods items of the same consignment it shall be provided at consignment level only.
[46]	EORI number shall be declared.
[47]	Where an EORI number or third country unique identification number (TCUIN) was assigned it shall be declared.
[48]	At least one of the following shall be declared: Estimated date and time of arrival (D.E. 15 03 000 000); transport document (D.E. 12 05 000 000) or previous document (D.E. 12 01 000 000). In maritime traffic in addition the entry key may be used.
[49]	In the address either street and number or P.O.box is to be declared.
[50]	This data element does not need to be provided where the declaration is lodged prior to departure.
[51]	This information shall only be provided when the declaration is amended.
[52]	This information can be provided alternatively on master consignment or on house consignment level upon referral request.
[53]	This information can be provided alternatively on master consignment item or on house consignment item level.
[54]	This information is not required: (a) when the goods are declared for release for free circulation under the special scheme for distance sales of goods imported from third countries and territories set out in Title XII Chapter 6 Section 4 of Directive 2006/112/EC; or (b) when the goods are of a non-commercial character sent from a third country by private persons to other private persons in a Member State and exempt from VAT pursuant to Article 1 of Council Directive 2006/79/EC (1).
[55]	This information is only required when the goods are declared for release for free circulation under the special scheme for distance sales of goods imported from third countries and territories set out in Title XII Chapter 6 Section 4 of Directive 2006/112/EC.
[56]	This information is only required if the declaration concerns goods referred to in Article 27 of Council Regulation (EC) No 1186/2009.
[57]	This information is not required in cases of multiple goods packed together and for postal consignments.
[58]	For Centralised Clearance at Import where more than one MS is involved, the information relating to the national codes shall be provided for the Authorising and Presentation MS.

[59]	When this data element is used at least either the code or text shall be provided.
[60]	This data element is to be provided when an authorisation exists according to the relevant section of Annex A to this Regulation, Title I Chapter 1.
[61]	This data element is optional when the declaration is submitted prior to presentation of goods.
[62]	This information shall relate to the situation at the moment when the declaration is made.
[63]	This information shall be provided for decisions relating to binding information.
[64]	The gross mass on item level does not need to be declared if the total gross mass is declared on "MC" or "HC" level.
[65]	This information shall only be provided when customs authority decided to seal the goods.
[66]	EORI number or third country unique identification number (TCUIN) shall be declared, where available.
[67]	This information shall be required when Region of dispatch is provided.
[68]	This information shall not be provided in the case of a pre-lodged declaration.
[69]	This information shall only be provided when codes are defined by the Member State concerned.
[70]	Not for use in the case there is no Customs office of transit (17 04 000 000) declared.
[71]	This information shall not be provided if it is the same as the Departure transport means (19 05 000 000).
[72]	Member States may waive this obligation if their systems allow them to deduce this information automatically and unambiguously from information elsewhere in the declaration.
[73]	This information shall be provided in the case of end-use authorisation.

MRN

C/A	Requirement Overview				XSD-path	
	G3	G4	G4G3	G5		
No/No	n/a	M DL	n/a	n/a	Basepath: Declaration/id	
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
None	id			an18	0	
Description:						
The MRN is automatically generated following the EUCDM legislation as a unique combination of 18 characters. The MRN is created by the Customs agency and is sent as part of the validation acceptance.						
Rules/codes/other relevant information:						
This element is only used in the additional messages: correction, amendment, invalidation, goods presentation, and supplementary declarations.						
The combination of the 18 characters is, in the time of writing, as follows: <ul style="list-style-type: none">- The last two digits of the year of formal acceptance of the declaration (e.g., '23' for 2023)<ul style="list-style-type: none">- Consist of 2 digits- 2. Country where the declaration/proof of the customs status of union goods/notification is lodged (e.g., 'DK' for Denmark)<ul style="list-style-type: none">- Consist of 2 letters- 3. Unique identifier based on year and country (e.g., 21DK04K21L01)<ul style="list-style-type: none">- Consist of 12 alphanumeric characters- 4. Procedure identifier (see tables below)<ul style="list-style-type: none">- Consist of 1 letter- 5. Check digit (e.g., '6')<ul style="list-style-type: none">- Consist of 1 alphanumeric character

Submitter

C/A	Requirement Overview				XSD-path	
	G3	G4	G4G3	G5		
Yes/Yes	M DL	M DL	M DL	M DL	Basepath: Declaration/Submitter	
EUCDM 6.1	XSD/XML-name			Format	M/O	Comment
None	name			an..70	M	
None	Identification_2			an..17	M	
None	sequence			n..2	M	
Description:						
The name and identifier of the company submitting the declaration.						
Rules/codes/other relevant information:						
Name: The CVR/SE-number to which the client certificate is registered.						
ID: The CVR/SE-number to which the client certificate is registered.						
If the certificate is registered to an EORI number, remember to include the 2-letter country code, otherwise only enter digits .						
XML-examples:						
<pre><ns3:Submitter> <ns3:name> <ns3:Text.Content>12345678</ns3:Text.Content> </ns3:name> <ns3:identification_2> <ns3:Identifier.Content>12345678</ ns3:Identifier.Content > </ns3:identification_2> <ns3:sequence> <ns3:Numeric.Content>1</ ns3:Numeric.Content > </ns3:sequence> </ns3:Submitter></pre>						

Amendment

C/A	Requirement Overview				XSD-path
	G3	G4	G4G3	G5	
No/No	n/a	M DL	n/a	n/a	Basepath: Declaration/Amendment
EUCDM 6.1	XSD/XML-name		Format	M/O	Comment
None	Sequence		n..5	M	
None	ChangeReasonCode		an..3	M	
None	ChangeReasonText		an..512	M	Must be at least 10 characters
Description:					
Only used for and is mandatory for correction, amendment invalidations requests. Is used to specify the reason for changes or invalidations.					
Rules/codes/other relevant information:					
Must only be declared when submitting an amendment/correction/invalidation (FunctionCode set to 1 or 4). There can only be declared one amendment field pr. request. Multiple amendments would require multiple requests. There are specific codes for indicating the reason for a correction/amendment/invalidation/'invalidation and repayment' in the ChangeReasonCode:					
Correction/amendment: <ul style="list-style-type: none">- '5': Corrected by declarant.- '6': Addition of missing data element.- '7': Mistaken customs procedure.- '8': Special circumstances that do not justify placement.- '10': Corrected by Customs.- '11': Corrected - quota quantity addition agreed.- '13': Corrected - by DMS.- '14': Corrected - by DMS.					
Invalidation <ul style="list-style-type: none">- '22': Goods have been returned to supplier- '23': Union goods declared by mistake- '24': Registration of same goods on several declarations- '25': Postal low value consignments returned on basis of barcode S10- '26': Accepted declarations with goods to be placed under another customs procedure- '27': The customs procedure is no longer justified due to special circumstances In the ChangeReasonText field there should be a short description for the reason of changes/invalidation of at least 10 characters .					
XML-examples:					
For correction/amendment: <pre><ns3:Amendment> <ns3:sequence> <ns3:Numeric.Content>1</ns3:Numeric.Content> </ns3:sequence> <ns3:ChangeReasonCode> <ns3:Code.Content>5</ns3:Code.Content> </ns3:ChangeReasonCode> <ns3:ChangeReasonText> <ns3:Text.Content>Spelling error in field</ns3:Text.Content> </ns3:ChangeReasonCode></pre>					

```
</ns3:Amendment>
```

For invalidation

```
<ns3:Amendment>
```

```
  <ns3:sequence>
```

```
    <ns3:Numeric.Content>1</ns3:Numeric.Content>

EUCDM 6.1	XSD/XML-name		Format	M/O	Comment
12 09 001 000	functionalReference		an..22	M	
Description:					
LRN – The local reference number (LRN) shall be used. It is nationally defined and allocated by the declarant or representative in agreement with the competent authorities to identify each single declaration.					
Rules/codes/other relevant information:					
No special characters are allowed. Must be unique on a submitter level but can be reused for resubmission if the declaration has been rejected, except for when the declaration has been rejected due to invalidation of a pre-lodged declaration. This means you can submit using the same (accepted) LRN using two different submitters, but never using the same submitter.					
XML-examples:					
<ns3:functionalReference> <ns3:Identifier.Content>140721DKQXYMEEW</ns3:Identifier.Content> </ns3:functionalReference>					

Warehouse

Description:					
Information about the place where the goods are located.					
Rules/codes/other relevant information:					
Using the relevant codes, enter the location where the goods may be examined. This location should be precise enough to allow customs to carry out physical control of the goods.					
Only one Type of Location (16 15 045 000) is to be used at the same time.					
The type of location, and how it is declared, is given by the fields: Type_2 and identificationType_2 . For declaring the location of goods there are predefined codes for indicating the type of location and how it is declared with specific possible values and combinations:					
Country (16 15 018 020): The country codes can be found here https://skat.dk/data.aspx?oid=1815411					
Type of location (16 15 045 000) This code Indicates the type of location where the goods will be presented. The type_2 codes and their types of locations are: - 'A': Designated place - 'B': Authorised place - 'C': Approved place					

- 'D': Other

Qualifier of identification (16 15 046 000):

Indicates how the location will be declared:

- 'U': UN/LOCODE
- 'V': Customs Office ID
- 'W': GNSS coordinates
- 'X': EORI number
- 'Y': Authorisation number
- 'Z': Free text

The valid combinations for the two fields are:

- 'A' and 'U': Designated place identified by UN/LOCODE (e.g., DKCPH-0011 for Copenhagen - Langelinie)
- 'A' and 'V': Designated place identified by Customs Office ID (e.g., DK007900 for Skatteceter København)
- 'B' and 'Y': Authorized place identified by Authorisation number.
- 'C' and 'Z': Approved place identified by filling in the address fields.
- 'D' and 'Z': Other place identified by filling in the address fields.
- 'D' and 'W': Other place identified by GNSS coordinates.
- 'D' and 'X': Other place identified by an EORI number.

Identification_2 (16 15 036 000)

The **UN/LOCODE** Should only be filled when (16 15 046 000) identificationType_2 = 'U'.

ID (16 15 053 000):

What to fill in this field is given by the Type of location, meaning that if:

- IdentificationType_2 = 'X': this field can be filled with an additional identifier to the EconomicOperator element. The EORI number itself should be filled in the identification field of the EconomicOperator element.
- If identificationType_2 is equal to any of the following this field should not be filled: 'Z', 'U', 'V', 'W'

The following subelements of **Address (16 15 018 00)** should be filled when identificationType_2 = 'Z':

CityName (16 15 018 022):

City name of the location of goods.

Country (16 15 018 020):

Line (16 15 019 00):

Street name and street number of the location of goods.

PostCode (16 15 018 020):

Post code of the location of goods.

The following subelements of **Address (16 15 018 00)** should be filled when identificationType_2 = 'T':

Country (16 15 081 020):

PostCode (16 15 081 021):

Postcode of the location of goods.

streetNumber (16 15 081 025):

Street name and street number of the location of goods.

authorisationReferenceNumber (16 15 052 000):

Authorisation number.

Should only be filled when identificationType_2 = 'Y'.

CustomsOffice (16 15 047 000):

Identification (16 15 047 001):

Customs Office ID (e.g., DK007900).

Should only be filled when identificationType_2 = 'V'.

Latitude (16 15 048 049):

Latitude coordinate of the location of goods.

Should only be filled when identificationType_2 = 'W'.

Longitude (16 15 048 050):

Longitude coordinate of the location of goods.

<p>Should only be filled when identificationType_2 = 'W'.</p> <p>EconomicOperator (16 15 051 000): identification: EORI number of Economic Operator. Should only be filled when identificationType_2 = 'X'.</p>

Total gross mass

C/A	Requirement Overview				XSD-path
	G3	G4	G4G3	G5	
Yes/Yes	n/a	M MCL HCL	M MCL HCL	M MCL HCL	MCL: Declaration/Consignment/ totalGrossMass HCL: Declaration/Consignment/HouseConsignment/ totalGrossMass
EUCDM 6.1	XSD/XML-name		Format	M/O	Comment
18 03 001 000	totalGrossMass		n..16,6	M	
Description:					
The weight of goods of the whole consignment including packaging but excluding the carrier's equipment for the goods.					
For G4:					
Enter the total gross mass, expressed in kilograms, of the goods concerned by the relevant consignment, as indicated on the house level transport document. The gross mass is the aggregate mass of the goods with all their packing, excluding containers and other transport equipment.					
Rules/codes/other relevant information:					
Where a gross mass greater than 1 kg includes a fraction of a unit (kg), it may be rounded off in the following manner: <ul style="list-style-type: none">from 0,001 to 0,499: rounding down to the nearest kg;from 0,5 to 0,999: rounding up to the nearest kg.					
A gross mass of less than 1 kg should be entered as '0,' followed by at most 6 decimals. (e.g. 0,123 for a package of 123 grams, 0,00304 for a package of 3 grams and 40 milligrams or. 0,000654 for a package of 654 milligrams).
