## 1 Pre-conditions

To complete the functional test case for "G4 Amendment", the company must have an established connection to the AS4-gateway, and have a functioning system user to DMS Import, see <u>Connectivity Guide & System Guide</u>.

Furthermore, ensure that you for this test case have the correct URLs, Services, and Actions, as seen below. In place of {CVR} and {UUID}, fill out your own CVR and UUID in the URL below. While the URLs and Services are the same for all the test cases, the Actions however, will change depending on the test case you are performing, please keep an eye out that you have the correct Action for the test case in hand.

To submit the XMLs for this test case, use the following endpoint:

URL	TFE Service	Action
https://secureftpgatewaytest.skat.dk:6384/exchange/CVR_{CVR}_UI_{UUID}	DMS.Import2	Manifest.Submit
https://secureftpgatewaytest.skat.dk:6384/exchange/CVR_{CVR}_UI_{UUID}	DMS.Import2	Manifest.Amend

For retrieving the notification, use the following endpoint:

URL	TFE Service	Action
https://secureftpgatewaytest.skat.dk:6384/exchange/CVR_{CVR}_UI_{UUID}	DMS.Import2	Notification

Please ensure that the "Test Case – G4 Temporary Storage" as well as the "Test Case – G3 Goods Presentation" have been completed before you try to complete the "Test Case – G4 Amendment" scenarios.

# 2 Process flow

The process flow for a G4 Amendment declaration can be seen in Figure 1 below:

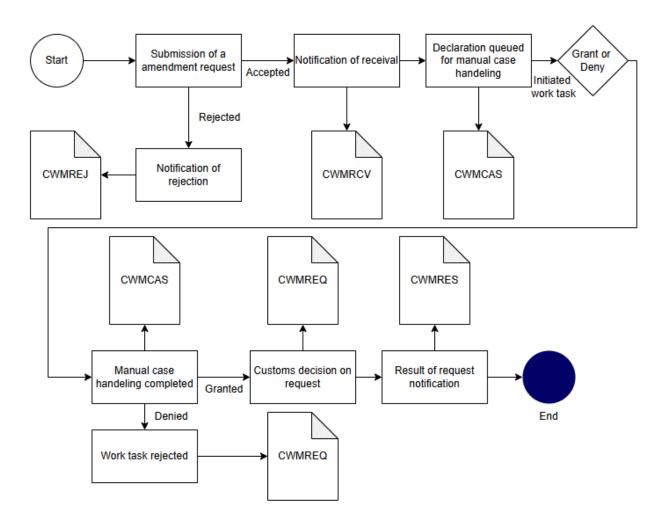

Figure 1: Process flow for G4 Amendment declaration.

## 3 Test Scenarios

To complete this test case, test scenario 1 and 2 must be passed successfully. Descriptions and specifics for each test can be found in the coming sections. Be sure to go through the scenarios thoroughly. It is recommended that you use the attached files to test the notifications.

Test no.	Test scenario	Passed/Failed
1	Submit G4 Amendment declaration, which is accepted	
2	Submit G4 Amendment declaration, which is rejected	

## 3.1 Description of test scenarios

The following sections will describe the aim of each specific scenario and provide the desired results of the test scenarios. It is worth noting that there can be changes in the notifications provided by DMS Import as the solution is still in development.

The purpose of the test scenarios is to ensure your connection to the system, and that you as a company can receive the correct notifications when sending in XMLs. Each step describes what you need to do when going through the test case. In the folder where you found this test case document an XML corresponding to the acceptance test case will be available. This can be adapted for the rejection case.

#### 3.2 Test scenario 1 – Acceptance

The aim of this scenario is to get a notification that the G4 Amendment XML has been accepted.

The following table shows the necessary test steps for completing this scenario as well as expected results. For the first step it is recommended using the provided declaration **XML** found in the Test Case folder. Secondly, make sure that your **LRN** and **MRN** corresponds to those of the G4 – Standard declaration, and the Submitter field is correct (this is done by putting your **CVR** in the Submitter/Name and Submitter/ID fields). The fields **DeclarantEORI**, **ConsigneeEORI** and **ConsignorEORI** should also be filled out with the corresponding EORI numbers for the Declarant, Consignee, and Consignor roles and the **WarehouseID** should be filled out with a valid warehouse. You should also make sure that the Amendment field is filled with a valid **ChangeReasonCode** and a **ChangeReasonText** of at least 10 characters. The placeholders are denoted in the XML by double curly brackets {{placeholder}}.

Step no.	Description of steps	Expected result	Passed
1	Use a <b>G4 Temporary Storage XML</b> (you can use the G4 Temporary Storage XML from the G4 Temporary Storage test case). It is found within the G4 Temporary Storage folder that is found in the parent directory at G4 Test Cases (remember to replace the placeholders)	You should have the test  XML ready for the next step	
2	Submit the declaration using the conditions found under Pre-conditions	The declaration should be sent to the system	
3	Pull the notifications	You should be able to pull the notification from the system	
4	Registration of submission of declaration	Receive a <b>CWMRCV</b> notification	
5	Use a <b>G3 Goods Presentation XML</b> (you can use the G3 Goods Presentation XML from the G3 Goods Presentation test case). It is found within the G3 Goods Presentation folder that is found in the parent directory at G3 Test Cases (remember to replace the placeholders – {{MRN}} should match the MRN from the initially submitted <b>G4 declaration</b> )	Find the <b>G3 Goods</b> Presentation XML in the G3 Goods Presentation test case folder	
6	Submit the declaration using the conditions found under Pre-conditions	The declaration should be sent to the system	
7	Pull the notifications	You should be able to pull the notifications from the system	
8	Acceptance of G4 submission of Goods Presentation request by receiving the CWMACC and CWMROG notification	Receive a <b>CWMACC</b> and <b>CWMROG</b> notification	
9	Use the provided "Test Case – G4 Amendment" <b>XML</b> found in the test case folder (remember to replace the placeholders – {{LRN}} and {{MRN}} should match the MRN and LRN from the initially submitted <b>G4 Temporary Storage declaration</b> ).	Find the <b>G4 Amendment XML</b> in the G4  Amendment test case folder	
10	Submit the declaration using the conditions found under Pre-conditions	The declaration should be sent to the system	

11	Pull the notifications	You should be able to pull notification from the system	
12	Successful validation of submission of amendment request by receiving the CWMRCV and CWMCAS notifications	You should receive the CWMRCV and CWMCAS notifications.	
13	After having received the <b>CWMCAS</b> , read the <b>AdditionalInformation</b> field regarding the status. This notification informs you of a manual acceptance work task being created.	You should find a  StatementCode field with the number 41 (CWMCAS Queued). Then in the  StatementDescription field there should be an explanation.	
14	When the queued request is completed, receive the final <b>CWMCAS</b> notification with changes to <b>AdditionalInformation</b> . This informs you that the worktask is completed.  A manual work task needs to be manually approved by a customs official. Until a customs official has manually processed your declaration, you won't receive any further notifications. As such, the declaration may remain on the previous step for some time if so, pull the notification again to get the notification.	One notification with  StatementCode field 43  (CWMCAS Completed).	
15	Acceptance of submission of Amendment request by receiving the <b>CWMREQ</b> and <b>CWMRES</b> notifications	Receive CWMREQ and CWMRES notifications and pass the test	

#### 3.3 Test scenario 2 – Rejection

The aim of this scenario is for the EO to get a notification that the G4 Amendment XML has been rejected.

The following table shows the necessary test steps for completing this scenario as well as expected results. For the first step it is recommended using the provided declaration **XML** found in the Test Case folder. Secondly, make sure that your **LRN** and **MRN** corresponds to those of the G4 – Standard declaration, and the Submitter field is correct (this is done by putting your **CVR** in the Submitter/Name and Submitter/ID fields). The fields **DeclarantEORI**, **ConsigneeEORI** and **ConsignorEORI** should also be filled out with the corresponding EORI numbers for the Declarant, Consignee, and Consignor roles and the **WarehouseID** should be filled out with a valid warehouse. You should also make sure that the Amendment field is filled with a valid **ChangeReasonCode** and a **ChangeReasonText** of at least 10 characters. The placeholders are denoted in the XML by double curly brackets {{placeholder}}.

Step no.	Description of steps	Expected result	Passed
1	Use a <b>G4 Temporary Storage XML</b> (you can use the G4 Temporary Storage XML from the G4 Temporary Storage test case). It is found within the G4 Temporary Storage folder that is found in the parent directory at G4 Test Cases (remember to replace the placeholders)	You should have the test  XML ready for the next step	
2	Submit the declaration using the conditions found under Pre-conditions	The declaration should be sent to the system	
3	Pull the notifications	You should be able to pull the notification from the system	
4	Registration of submission of declaration	Receive a <b>CWMRCV</b> notification	
5	Use a <b>G3 Goods Presentation XML</b> (you can use the G3 Goods Presentation XML from the G3 Goods Presentation test case). It is found within the G3 Goods Presentation folder that is found in the parent directory at G3 Test Cases (remember to replace the placeholders – {{MRN}} should match the MRN from the initially submitted <b>G4 declaration</b> )	Find the G3 Goods  Presentation XML in the G3 Goods Presentation test case folder	
6	Submit the declaration using the conditions found under Pre-conditions	The declaration should be sent to the system	
7	Pull the notifications	You should be able to pull the notifications from the system	
8	Acceptance of G4 submission of Goods Presentation request by receiving the <b>CWMACC</b> and <b>CWMROG</b> notification	Receive a CWMACC and CWMROG notification	
9	Use the provided "Test Case – G4 Amendment" <b>XML</b> found in the test case folder (remember to replace the placeholders – {{LRN}} and {{MRN}} should match the MRN and LRN from the initially submitted <b>G4 Temporary Storage declaration</b> ).	Find the <b>G4 Amendment XML</b> in the G4 Amendment test case folder	

10	Adapt the <b>G4 Amendment XML</b> with the information with the invalid data in the element <b>Amendment</b> as shown in section 3.3.1 to ensure rejection of the XML.	Enter elements from section 3.3.1	
11	Submit the declaration using the conditions found under Pre-conditions	The declaration should be sent to the system	
12	Pull notifications	You should be able to pull notification from the system	
13	Rejection of a submission of amendment request by receiving the CWMREJ notification	Receive the <b>CWMREJ</b> notification and pass the test	

#### 3.3.1 XML example
