The aim of this document

The aim of this document is to give an in-depth description of the different fields and data elements contained in the XSD-files for Exit declarations based on the EU Customs Data Model - https://eucdm.softdev.eu.com/

The document is structured after the EUCDM grouping of the data elements as well as DMS-specific data fields that are required by the system when using the S2S solution:

- **System-specific fields**: This section includes fields that are needed by the system to recognize what declaration is sent in, who is submitting the declaration, as well other data that is needed to fulfill the desired action.
- Group 11: This section contains basic information about the declaration and which procedures the declaration should be processed under. All this information influences how the declaration is processed, what kind
 of business scenario and procedure to be expected and requested.
- **Group 12**: This section is for the submitter to present all other relevant information and documents related to the submitted declaration that is not contained in the data fields. This is especially used for references tracking documents, authorizations and supplying tracking numbers.
- **Group 13**: This section contains information on all parties involved in the Exit procedure. It is here information on the importer, exporter, declarant, fiscal reference, representative, etc., is provided either by ID or other identifiable information depending on whether the party is a company or private person.
- **Group 14**: In this section valuation information is given, examples of valuations are: taxes, transportation costs, delivery terms, etc.
- Group 16: This section contains the location-related information, e.g., where the goods will be or are presented (depending on whether it is a pre-lodged or a standard declaration) as well as the countries involved in the export/exit process.
- **Group 17**: This section contains information regarding which customs offices have handled the goods in the export/exit process.
- **Group 18**: In this section the submitter supplies more detailed information on the goods item(s) such as a weight, description, Taric code(s), etc.
- **Group 19**: This section contains information about the form of transport of goods, e.g., modes, container information, equipment, etc.
- Group 99: This section contains other information in the declarations which does not fit into the other above-mentioned groups.

Under each data element in the groups is provided a detailed description on whether the field is mandatory or optional as well as what rules to adhere to depending on the desired business scenario to make use of, and XML-examples are provided to give context.

Information on the EUCDM ID6 reference code is provided to help the reader in seeking further information if needed.

Additionally, under some of the data element you will see codelist or rulecode codes identifying codes and rules for this element. These elements are relevant under the transitional period of the new system, and you can identify them in the Codelists.xslx or Rulecodelist.xlsx sheets found on <u>GitHub</u>. The first document can be used to identify the CLxxx errors, and the second document can be used to identify the rest. If there is an error not presented in comments of the data elements, or you can not find it in the code-/rulecodelist sheets, please contact the Danish Customs Agency for further assistance on the subject.

Glossary

To make the document shorter and easier to read, some abbreviations are used. Here is a list of the abbreviations used in this document.

| Abbreviation | Description | Details |
|--------------|-----------------------------------|---|
| M | Mandatory | The field is mandatory to declare. |
| 0 | Optional | The field is optional to declare or should only be declared if rele- |
| | | vant information is available. |
| MC | Conditionally mandatory | The information is mandatory dependent on other information |
| | | given in the declaration, e.g., type of declaration or commodity |
| | | code. |
| DL | Declaration level | The information is given on header level and applies to all the |
| | | goods items in the declaration. |
| GSL | Goods shipment level | The information is given on goods shipment level and applies to |
| | | all the goods items in the goods shipment. |
| GIL | Goods item level | The information is given on goods item level and applies to only |
| | | the goods item it is declared under. |
| C/A | Defines whether an element can | Yes/Yes means can be corrected and amended. |
| | be corrected or amended | Yes/No means it can be corrected but not amended |
| | | No/Yes means it can't be corrected but it can be amended |
| | | No/No means it can't be corrected or amended |
| EUCDM | European Union Customs Data | The European Union Customs Data Model (EUCDM) is the model |
| | Model | for Customs trans-European systems such as NCTS, AES, ICS, EOS |
| | | and for Member States national customs clearance systems |
| XSD | XML Schema Definition | A document that specifies how to formally describe the elements |
| | | in an Extensible Markup Language (XML) document. This de- |
| | | scription can be used to verify that each item of content in a doc- |
| | | ument adheres to the description of the element in which the |
| | | content is to be placed. |
| XML | Extensible Markup Language | A simple text-based format for representing structured infor- |
| | | mation, storing, and sending data. It is the file format used to |
| | | send declarations to DMS. |
| n/a | Not Applicable | The information does not apply to the given element/declaration. |
| Requirement | Mandatory / Optional / Condition- | Defines whether an element is M, O, MC (see abbreviations |
| Overview | ally mandatory / Levels / Rules | above) or whether any EUCDM rules apply to the given element |
| | | in a specific declaration. |
| M/O | Defines whether a field is manda- | For a lot of input fields, the sub elements of that field are not al- |
| | tory or optional when the main | ways mandatory even though the overall input field is. |
| | field is in the XML Mandatory/Op- | |
| | tional | For example, is Supporting Document, which is optional, but |
| | | when put into to an XML, SequenceNumeric and ID becomes |
| 175 | N. D | mandatory as the only elements. |
| ND | Not Determined | The mandatory or optional status of these elements are not yet |
| | | determined. |

Footnotes

Throughout the XML-Guide you will see several footnotes, all of these refers to this table. All these footnotes can also be found on EUCDM.

| FOOTNOTE | DESCRIPTION |
|----------|--|
| [2] | In the cases where Article 166(2) of the Code (simplified declarations based on authorisations) is |
| | applicable, Member States may waive the obligation to provide this information where the condi- |
| | tions prescribed in the authorisations associated with the procedures concerned allow them to |
| | defer the collection of this data element in the supplementary declaration. |
| [3] | This element is an alternative to the unique consignment reference number [UCR] when the latter |
| | is not available. It provides a link to other useful sources of information. |
| [6] | Where the EORI number or a third country unique identification number recognised by the Union |
| | is provided, the name and address shall not be provided. |
| [8] | This information shall only be provided where available. |
| [26] | This data element is an alternative to the Commodity code when it is not provided. |
| [28] | This data element is an alternative to the description of goods when it is not provided. |
| [46] | EORI number shall be declared. |
| [62] | This information shall relate to the situation at the moment when the declaration is made. |

Description:

This data element is the code which indicates what type of request is being sent, whether it be a submission, amendment, correction, etc. There are predefined codes for each request.

Rules/codes/other relevant information:

It is possible to use these codes:

- 1: Cancellation/Invalidation request to an already existing declaration
- 4: Correction/Amendment request to an already existing declaration
- 9: Initial submission of a declaration

Description:

The MRN is automatically generated following the EUCDM legislation as a unique combination of 18 characters. The MRN is created by the Customs agency and is sent as part of the validation acceptance.

Rules/codes/other relevant information:

This element is only used in the additional messages: correction, amendment, invalidation, goods presentation, and supplementary declarations.

The combination of the 18 characters is, in the time of writing, as follows:

- The last two digits of the year of formal acceptance of the declaration (e.g., '23' for 2023)
 - Consist of 2 digits
- 2. Country where the declaration/proof of the customs status of union goods/notification is lodged (e.g., 'DK' for Denmark)
 - Consist of 2 letters
- 3. Unique identifier based on year and country (e.g., 21DK04K21L01)
 - Consist of 12 alphanumeric characters
- 4. Procedure identifier (see tables below)
 - Consist of 1 letter
- 5. Check digit (e.g., '6')
 - Consist of 1 alphanumeric character

Description:

Only used for, and is mandatory for correction, amendment invalidations requests.

Is used to specify the reason for changes or invalidations.

Rules/codes/other relevant information:

Must only be declared when submitting an amendment/correction/invalidation.

There can only be declared one amendment field pr. request. Multiple amendments would require multiple requests.

There are specific codes for indicating the reason for a correction/amendment/invalidation/invalidation and repayment in the ChangeReasonCode:

Correction/amendment:

- '5': Corrected by declarant.
- '6': Addition of missing data element.
- '7': Mistaken customs procedure.
- '8': Special circumstances that do not justify placement.
- '10': Corrected by Customs.
- '11': Corrected quota quantity addition agreed.
- '13': Corrected by DMS.
- '14': Corrected by DMS.

Invalidation

- '22': Goods have been retns3ed to supplier
- '23': Union goods declared by mistake
- '24': Registration of same goods on several declarations
- '25': Postal low value consignments retns3ed on basis of barcode S10
- '26': Accepted declarations with goods to be placed under another customs procedure
- '27': The customs procedure is no longer justified due to special circumstances

In the ChangeReasonText field there should be a short description for the reason of changes/invalidation of at least 10 characters.

Description:

Information about the place where the goods are located.

 $Rules/codes/other\ relevant\ information:$

GoodsLocation (16 15 000 000):

The type of location, and how it is declared, is given by the fields: **Type of Location** and **Qualifier of Identification**. For declaring the location of goods there are predefined codes for indicating the type of location and how it is declared with specific possible values and combinations:

Type of Location (16 15 045 000)

Indicates the type of location where the goods will be presented. The types of locations are:

- 'A': Designated place
- 'B': Authorised place
- 'C': Approved place
- 'D': Other

Qualifier of Identification (16 15 046 000):

Indicates how the location will be declared:

- 'U': UN/LOCODE
- 'V': Customs Office ID
- 'W': GNSS coordinates
- 'X': EORI number
- 'Y': Authorisation number
- 'Z': Free text
- 'T': Postal code

Valid combinations for the two fields are (but not necessarily limited to):

- 'A' and 'U': Designated place identified by UN/LOCODE (e.g., DKCPH-0011 for Copenhagen Langelinje)
- 'A' and 'V': Designated place identified by Customs Office ID (e.g., DK007900 for Skattecenter København)
- 'B' and 'Y': Authorised place identified by Authorisation number.
- 'C' and 'Z': Approved place identified by filling in the address fields.
- 'D' and 'Z': Other place identified by filling in the address fields.
- 'D' and 'W': Other place identified by GNSS coordinates.
- 'D' and 'X': Other place identified by an EORI number.

UNLocode (16 15 036 000)

Indicates the goods location with UN/Locode for the given location e.g. 'DKCPH-0011'.

NB: CL244 which uses format "DKCPH" (without '-0011'), is <u>only</u> used for "Centralized Clearance' scenarios. Should only be filled when Qualifier of Identification = 'U'.

authorisationReferenceNumber (16 15 052 000):

Should only be filled when Qualifier of Identification = 'Y'.

role (16 15 053 000):

What to fill in this field is given by the Type of location, meaning that if:

Qualifier of Identification = 'Y': this field must contain the additional identifier ("adresse løbenummer") for the Approved place of presentation authorization

Qualifier of Identification = 'X': this field <u>can</u> be filled with an <u>additional</u> identifier to the EconomicOperator element. The EORI number itself should be filled in the identification field of the EconomicOperator element.

CustomsOffice (16 15 047 000):

identification (16 15 047 001):

Customs Office ID (e.g., DK007900).

Should only be filled when Qualifier of Identification = ${}^{\prime}V^{\prime}$.

See the list of Customs Office ID's here:

https://ec.europa.eu/taxation_customs/dds2/rd/rd_consultation_location.jsp?Lang=en

latitude (16 15 048 049):

Latitude coordinate of the location of goods.

Should only be filled when Qualifier of Identification = 'W'.

longitude (16 15 048 050):

Longitude coordinate of the location of goods.

Should only be filled when Qualifier of Identification = 'W'.

EconomicOperator (16 15 051 000): identification (16 15 051 017): EORI number of Economic Operator. Should only be filled when Qualifier of Identification = 'X'. The following sub elements of Address (16 15 018 00) should only be filled when Qualifier of Identification = 'Z': cityName (16 15 018 022): City name of the location of goods. country (16 15 018 020): Country code of the location of goods. line (16 15 018 019): Street name and street number of the location of goods. postcode (16 15 018 021): Post code of the location of goods. The following sub elements of Address (16 15 081 000) should only be filled when Qualifier of Identification = "T': country (16 15 081 020): Country code of the location of goods. postcode (16 15 081 021): Post code of the location of goods. streetNumber (16 15 081 025): Street name and street number of the location of goods. Contact (16 15 074 000): can only be filled when Qualifier of Identification is NOT = 'V' name (16 15 074 016): name of the contact person **Communication:** Contains the communication information for the contact person identification (16 15 074 075 / 16 15 074 076): contains either phone number or email address for the contact person, depending on the type type: indicates whether the communication is phone number or email, valid input is "EM" or "TEL".
